

## Creating Harmony and Building Community Since 2006

Established in 2006, Roman Music Therapy Services is a vibrant and growing community agency, unique in its scope and talent. As the only independently owned music therapy business in Massachusetts, our team shines with a diverse group of highly qualified and accomplished music therapists, a dedicated staff of administrative professionals, and the capacity to serve families, businesses, communities, and agencies through all of life's stages and ages.

In 2016, after a rigorous credentialing process, Roman Music Therapy Services became certified by the Commonwealth of Massachusetts as a Woman Owned Business Enterprise (WBE).

Meredith Pizzi, Founder and Executive Director of Roman Music Therapy Services, began serving clients out of her car with a few bags of instruments. When her initial caseload of two contracts grew, so did her team! Today, Roman Music Therapy Services is comprised of 14 employees, including 11 music therapists with diverse backgrounds, clinical areas of expertise, and professional strengths. Meredith's theoretical framework of the Music Therapy Pyramid Model has been guiding our team's work in community settings as we provide universal, preventative, promotive, clinical and advanced clinical services from birth through end of life care.

Our mission, to serve others through transformative, human-centered music making, is demonstrated in all that we do. Throughout Eastern Massachusetts, including the Boston, North Shore, South Shore and Metro West areas, providing exceptional service to individuals, families, schools, and agencies is what drives us! From our award winning early childhood program, Sprouting Melodies®, to services for older adults, we are passionate about serving as a resource for the community regarding music, development, health and wellness.

### Our Mission:

Serving others through transformative, human-centered music making.

Making Music • Transforming Lives

Working from a humanistic and person-centered perspective, our team uses music to help solve problems and address individual or organizational concerns in creative and innovative ways. Our tools for problem solving just happen to be musical instruments and the music itself!

For community organizations and large service providers, partnering with Roman Music Therapy Services provides an opportunity to include dynamic, innovative, and creative music therapists on your team. Our music therapists care deeply about providing integrative services that address clinical needs, promote skills and abilities, prevent secondary risks, and improve universal connections to enhance the well-being of individuals and systems and improve quality of life. In recent years, we have broadened our services to include work with veterans, within hospital settings and with hospice patients and their families.

**Our Vision:**  
To create connections and build community for people of all ages and abilities, now and for generations to come.

With a dynamic and growing team of Board Certified Music Therapists, we can create customized programming options adapted to the needs of the individuals and organizations we serve.

Offering alternative services in the home, community, or our music therapy center, our team of music therapists welcomes the opportunity to support all people in reaching their full potential.

We can also protect your organization's investment in a music therapy program with ongoing supervision, access to professional and specially selected music instruments to facilitate engagement, and assure continuity of services for your organization with highly qualified and vetted professionals.

In all that we do, we are dedicated to the positive impact and outcomes of music therapy for our clients. Through clinical music therapy services and community based programs and events designed to help people build connections, we facilitate and support meaningful music moments and experiences for our clients.
